

# Splitter with Bracket PD-0

## ◆ Purpose of Use

<Patented>

- To break big applications such as bedrock, concrete foundation of construction etc.

## ◆ Operating Instruction

- Comparing with conventional methods such as hydraulic breakers, explosion, and non-explosive demolition agent, it is much safer, quieter, and less vibration.
- The Powerful Rock Splitter is attached to a bracket. The bracket is to be attached to an excavator. It can be moved to applications and the wedge can also be turned and set the splitting directions. The operating efficiency is drastically improved.
- Compact structure yet high destruction power.
- Over on all our technologies we have developed with the Standard Rock Splitter, we accomplished the lightest and most powerful large-size splitter in the class.

## ◆ Specifications

Model	Wedge			Weight (kg)	Bit Diameter (mm)	Max.wedge Extending Length (mm)	Breaking Power (MN)
	Diameter (mm)	Effective Length (mm)	Splitting Distance (mm)				
PD-0	95	1,100	25	2,300	102	1,700	26

## ◆ Operating Instruction

- 1) Make a hole of specified diameter.
- 2) Insert the wedge into the hole in the splitting direction, and turn the lever on the pump to crack the rock.
