

Splitter with Small Drill PD-1

〈Patented〉

Compact and light model of The Splitter with Drill

◆ Features

- Drilling and splitting can be operated from the cabin.
- You can conduct drilling and splitting tusks safely and continuously in the cabin without any danger and heavy work.
- By using hydraulic breakers, you can save even more time.
- No waiting time like non-explosive demolition agent. So you do not have to worry about the site when you leave the site while waiting for the demolition.
- No blasting. So you do not have to flee for safety. You can more easily make a schedule of your work.
