

Sectional Anchor Drill UDRR

◆ Assembling and disassembling are easy with pins connections.

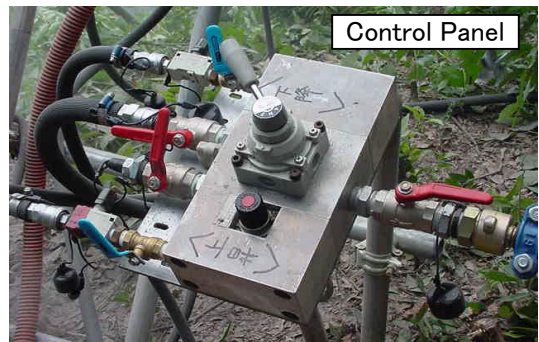

<Features>

<Patented>

- To be carried by people, it is made to be light and decomposable.
- It can be set up in a short time.
- The slide guide for the drill is air cylinder type. The drill can be moved up and down by a remote controller. Therefore work condition is good and operation can be done safely.
- Thanks to air cylinders, rod connecting and hole cleaning tasks are easy and quick.
- Air cylinder feeders absorb vibration from drills and reactive force from bed rocks. Hence the durability of feed cell parts and drills are high.
- The installation pattern can be adjusted to each drilling method.

Pipes installation
